

Chopping Block

Kyle Dennewith, Cole Manchester, Ryan Beck, Santos Gonzalez

Features/Functionality

User Registration/Login Page – Mainly so a user can upload recipes online, that way they're not using their phones storage

Recipe viewer – Allows you to search up other people's recipes, allowing you to track future recipes you would like to try out

Recipe Creator – Creates your own recipe, Name and description needs to be present which can be changed later.

Inside of Recipe Creator is an ingredient list which allows you to search for/list ingredients. Searching might be complicated, it might be easier to just have the user list ingredients manually in a list format.

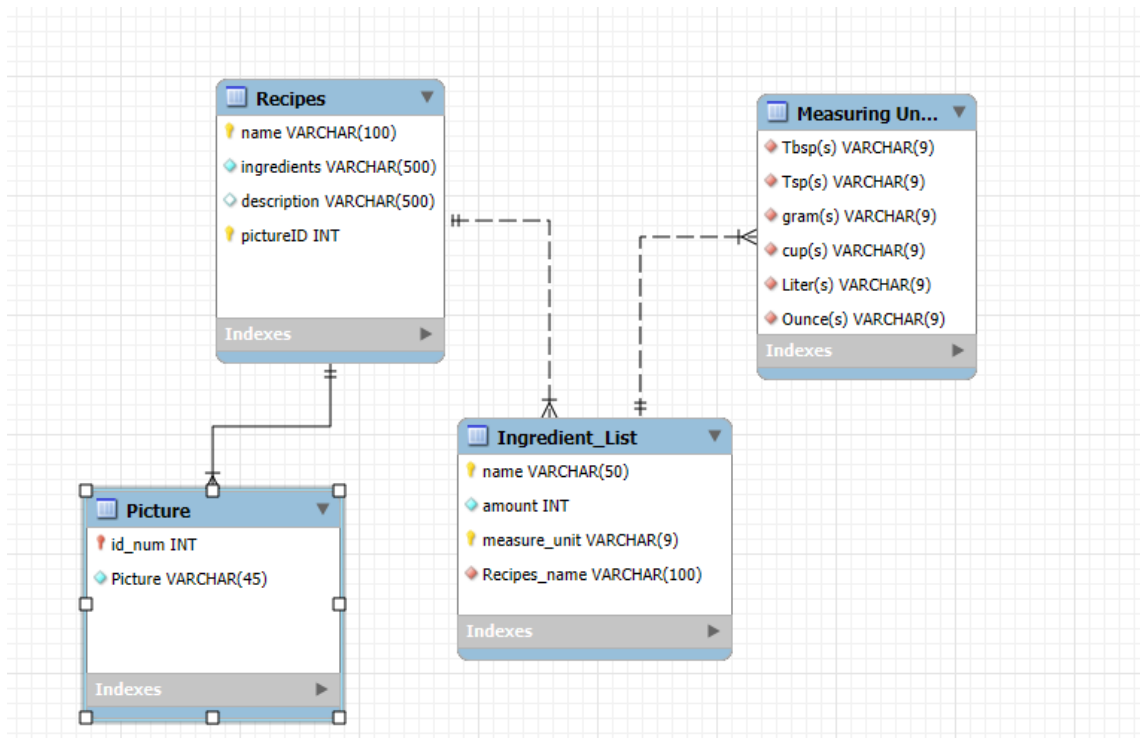

Measurements – A interactable for each ingredient so that you or other users can use the correct measurement of spices, eggs, etc.

Along with that, step-by-step guide on how to cook the recipe

Offline version – Saved to local machine, i.e. not stored on servers

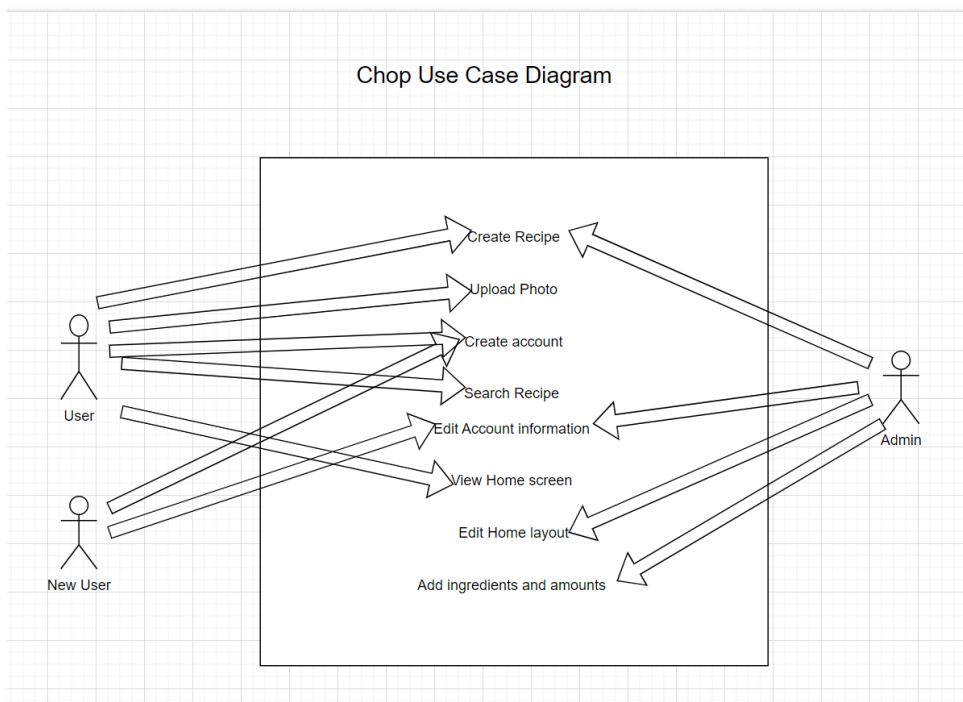

Checklist – Useful to see if you have those ingredients and what needs to be put on a grocery list. Multiple lists for multiple recipes
